

```
package practice;

import java.util.Scanner;

public class reverseloop {
    public static void main (String args[]) {
        Scanner scan=new Scanner (System.in);
        System.out.println("Enter the value :");
        int d =scan.nextInt();
        for(int i=10;i>=d;i--) {
            System.out.print(i+" ");

        }

    }
}
```

output :
Enter the value :
1
10 9 8 7 6 5 4 3 2 1
