

```
package collection;
```

```
import java.util.LinkedList;
```

```
import java.util.Queue;
```

```
public class queue {
```

```
    public static void main(String[] args) {
```

```
        Queue<String>q=new LinkedList();
```

```
        q.offer("ss");
```

```
        q.offer("dhamu");
```

```
        q.offer("arun");
```

```
        System.out.println("before :");
```

```
        System.out.println(q);
```

```
        System.out.println("after:");
```

```
        //remove and display:-
```

```
        q.poll();
```

```
        System.out.println(q);
```

Output:

```
before :  
[ss, dhamu, arun]  
after:  
[dhamu, arun]
```
