

```
package practice;

import java.util.Scanner;

public class daysinmonth {

    public static void main(String args[]) {

        Scanner r=new Scanner(System.in);

        System.out.println("ENTER THE YEAR :");

        int year=r.nextInt();

        System.out.println("Enter the month:");

        String month=r.next();

        int days=0;

        switch(month){

            case "1","3","5","7","8","10","12":

                days =31;

                break;

            case "2":

                days =29;

                break;

            case "4","6","9","11":

                days=30;

                break;

        }

        System.out.println(days);

    }

}
```

output :

```
ENTER THE YEAR :
2016
Enter the month:
2
29
```
