```java
package Stringprograms;

public class mergestring {
    public static void main(String[] args) {
        String word1="soft";
        String word2="logic";
        System.out.println("After merge :");
        System.out.println(word1.concat(word2));
    }

}
```

Output:

```
After merge :
softlogic
```
