```java
package Stringprograms;

public class compare_strings {

    public static void main(String[] args) {
    String s1="This is string task";
    String s2="This is string Task";
    int ans=s1.compareToIgnoreCase(s2);
    if(ans==0) {
        System.out.println(s1);
        System.out.println(s2);
        System.out.println(s1+" is equal to "+s2);
    }
    }

}
```

output :

This is string task
This is string Task
This is string task is equal to This is string Task
