```java
package arrays;
import java.util.Scanner;
public class arraynum_reverse {

    public static void main(String[] args) {
        //Scanner s=new Scanner(System.in);
     // System.out.println("enter the num:");
        //int num[]=new int[5];
        // int n=s.nextInt();
      //int i=num.length-1;
        int num[]= {2,4,6,8,10};
        System.out.println("Reverse of this array :");
        for(int i=num.length-1;i>=0;i--)
        {
            System.out.print(num[i]+",");

        }

    }

}
```

output :

Reverse of this array :
10,8,6,4,2,
